About Me

I am a Computer and Information Sciences student at AUT expected to graduate by late 2024. Currently, I am actively seeking a graduate role in the software development industry where I can gain hands-on experience and further scale my skill set. I would love to apply my academic knowledge to solve real-world problems in a full-time graduate role.

My Interests

I maintain a disciplined routine in my daily life by regularly working out. This not only helps me stay physically fit but also instils a sense of discipline in me. For me, going into the gym means continuous self-improvement, allowing me to push my physical limits and achieve my fitness goals.

Skateboarding is more than just a hobby to me, it's a significant part of my social life. Many of my closest friendships have come from my shared love of skateboarding

Experience

Future Me Intern   11/2023 - 02/2024
ASB

After the second year of my degree, I had the amazing opportunity to work as a technology intern at ASB over the summer. This internship strengthened my teamwork skills and taught me how the project lifecycle operates within a large corporate environment. I learned how to apply ASB's core values in my day-to-day life with colleagues and with my work. I also expanded my technical skills and experience with using Git in larger project bases, as well as gaining experience with Azure after getting my Microsoft AZ900 certificate.

Disability Support Worker   05/2022 - 09/2022
Private

As a private disability support worker, my primary responsibility was to provide dedicated assistance to my client's son Stefan. This role not only allowed me to contribute to Stefan's well-being but also provided me with valuable opportunities for personal and professional growth. This experience helped me enhance my communication and problem-solving skills by addressing barriers that individuals with disabilities may encounter in their daily lives.

Website Developer and Marketer   04/20221- 10/2021
Kitset Wardrobes

During highschool, I engaged in a 6-month contract with Kitset Wardrobes, a private company specializing in wardrobe solutions. Whilst at Kitset Wadrobes, I provided services including web design and video content creation for advertising.

Product Merchandiser   05/2019 - 04/2020
Goodman Fielder

My first ever job at the age of 15, I began working weekends during high school as a product merchandiser for Goodman Fielder. I was responsible for stocking products as well as counting and managing stock on my working days.

Education

Bachelor of Computer and Information Sciences   2022 - 2024
Auckland University of Technology

I am scheduled to graduate in November 2024 with a major in Software Development and a minor in Data Science.

Skill Set

- Proficient in Java, developing several programs and completing various assignments that required me to apply OOP concepts.
- Proficient in C, having learned it as my first programming language whilst studying at AUT.
- Experienced in MySQL and R, with a solid understanding of database design, querying, and database management.
- Experienced in Python, I've utilized Python for scripting, data analysis, and automation tasks.
- Proficient in version control systems like Git, I've collaborated on projects with teams using branching, merging, and pull requests to manage code changes effectively.

- Proficient in Linux and Bash scripting, having utilized command-line interfaces for various tasks such as system administration, automation, and file management.
- Experienced in Azure cloud computing platform, leveraging skills acquired during an internship at ASB and completion of Azure courses.
- Experienced in software development lifecycle practices. I've participated in requirements gathering, design, implementation, testing, and deployment phases, following Agile methodologies for efficient project management.
- Demonstrated strong leadership skills, as a SCRUM Master, through experience in leading and organizing two university group projects.
